

FOUND OBJECT SCULPTURE

Supply List

Instructor: Donnell Williams

Supplies that you will need:

1. Work gloves
2. Small ball peen hammer
3. Wire cutter
4. Needle nose pliers
5. Hand sheet metal shears
6. Screw drivers: flat head and phillips head

You can purchase these items at a reasonable price at Harbor Freight Tools; located off Asher and University, down from Big Lots.

You may want to bring a drill (cordless or electric) but not necessary.

Bring found objects that are small and can be incorporated on a copper sheet that's approximately (15"x15"). Items can be cold connected (wired, screwed or rivet) and soldered to the copper. There will be a collection of found objects at the workshop that you can use as well. Think outside the box for this workshop!
